Paul: I am currently revising the La Sal Mines Complex NOI to address your comments from last fall. It looks like we are finally seeing some progress on the EA, so I would like to get the DOGM permit finalized as well. We obtained the attached seed mixes from the BLM and USFS earlier this year for the project. We used the Attachment 2 seed mix to reclaim the Pine Ridge site. One of the seed mixes is for the higher elevation areas and one is for the lower elevation areas (Beaver and La Sal) of the project. I noticed that both seed mixes were quite a bit different than that proposed on page 39 of the NOI. Could you have your vegetation person take a look at these mixes and let me know if he/she is OK with them before I revise the NOI. Thanks much, Frank

Subject: Approved Seed Mixes for use at Beaver Shaft, La Sal, Pandora, Snowball and Pine Ridge

Dear Race:

In recent communications with Rebecca DooLittle at the BLM and Joel Nowak at the US Forest Service, the attached tables were provided as approved seed mixes for use at the following mine sites:

- Attachment 1:
 - Beaver Shaft
 - La Sal
- Attachment 2:
 - Pandora
 - Snowball
 - Pine Ridge

The bulk pounds per acre are based on broadcast seeding. Sometimes the vegetation establishes more successfully if hydro mulch is added. Any seed supplier can be used as long as the seed is certified noxious and invasive weed-free. Take a picture or copy the label from the bag and send it to the agency when the seeding is completed.

Please contact me if you have any questions about these seed mixes. These are a bit different from the mix that we sent you a few weeks ago for Pine Ridge. Sorry about the change.

Thanks,

Andrea

Mike--

Would you please respond to Frank? I'll let him know I'm asking you to do this. Thank you.

Frank,
I'll review these and get back to you on them.
Thanks,
